Introduced by Senator Galbraith

Referred to Committee on

Date:

Subject: Agriculture; control of pesticides; neonicotinoids

Statement of purpose of bill as introduced: This bill proposes to ban the use, sale, or application of neonicotinoid pesticides.

An act relating to the use of neonicotinoid pesticides

It is hereby enacted by the General Assembly of the State of Vermont:

Sec. 1. FINDINGS

The General Assembly finds that:

(1) Bumblebees, native bees, and honey bees pollinate native plants and crops in Vermont and, therefore, are vital to Vermont’s ecology and agriculture.

(2) Bee populations are declining sharply in Vermont and nationwide. Several species of bumblebees are now extinct in Vermont, including the rusty-patched bumblebee, the Ashton cuckoo bumblebee, and the American bumblebee. The yellow-banded bumblebee is seriously imperiled in Vermont and urgent action is required to prevent it from becoming extinct.
(3) The use of neonicotinoid pesticides, a relatively new class of
pesticides, contributes significantly to the decline of bee populations in
Vermont and elsewhere.

(4) Fifteen countries have imposed a moratorium on the use of
neonicotinoids.

(5) In order to help preserve Vermont’s bee populations and,
consequently, its native plant species, and to maintain the essential role of bees
as pollinators of crops in Vermont, the sale and use of neonicotinoid pesticides
should be banned in Vermont.

Sec. 2. 6 V.S.A. § 1113 is added to read:

§ 1113. USE AND SALE OF NEONICOTINOID PESTICIDES

(a) Beginning on July 1, 2014, no person shall sell, use, or apply the
pesticide imidacloprid, clothianiden, thiamethoxam, donotafuran, or any other
member of the nitro group of neonicotinoid pesticides except when the
Secretary of Agriculture, Food and Markets determines that a threat to
Vermont crops exists that requires the use of a neonicotinoid pesticide and no
other class of pesticides would be effective in addressing the threat.

(b) When the Secretary of Agriculture, Food and Markets determines that a
threat to Vermont crops exists, he or she shall prescribe the type of pesticide
that may be used, the conditions for use, and the period for which it may be
used, provided that no pesticide authorized to address a threat to Vermont
crops under this section shall be authorized for use for more than eight succeeding months.

Sec. 3. EFFECTIVE DATE

This act shall take effect on passage.
